Dear Mr. David P. Daugherty:

RE: Week 1 Update

First, on behalf of all of Custom Fit Coding, I would like to thank you for selecting our company for the Cooking to Goal project. It was our preference goal, so thank you from all of us.

We have begun planning our developmental environment, particularly true of our document, code, mail, and operations management systems. In our first meeting, we discussed our options for a revision control system and through our Google Docs groupware suite, we were able to collaborate toward our next project deliverable to you. I have attached the meeting notes for you.

We plan to have much more information available to you in our next project update.

Sincerely,

David A. Ball
